Art Unit: 1714

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by US Pat. No. 6197863 Eck et al..

Eck discloses the instantly claimed functionalized silica, its use in coatings, and the method of making it at the abstract; column 5, lines 34-67; column 6, lines 48-59; column 9, lines 4-45 and 66-67; column 10, lines 1-10; and the remainder of the document.

4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 6197863 Eck et al..

Eck discloses the instantly claimed functionalized silica, its use in coatings, and the method of making it at the abstract; column 5, lines 34-67; column 6, lines 48-59;

Art Unit: 1714

column 9, lines 4-45 and 66-67; column 10, lines 1-10; and the remainder of the document. It would have been obvious to one of ordinary skill in the art at the time of invention to use the silica of Eck with a polyurethane coating because the silica of Eck is described for use in coatings at column 9, lines 10-11 and polyurethanes are such well known paints/coatings.
